

Microcell Companion Ultra Low Profile Support Surface

Adds dynamic pressure relief
to ANY reclining chair.

*'By using the MicroCell Companion
we have probably saved the NHS the
cost of an admission and the emotional
stress to the user and family'
– Senior O.T. in the South West*

The Microcell Companion has been specifically created for Recliner users who refuse to sleep in their beds. This surface prevents and helps heal pressure sores and delivers instant benefits for recliner users – an area of pressure care that is sometimes overlooked.

- Patented MicroCell air cell design gives an ultra-thin pressure surface which ensures that the patient's position is not impacted
- Compelling pressure mapping results whilst offering increased comfort level
- The PU film air cell bank is fitted into a fully welded Dartex cover which is both waterproof and vapour permeable
- Adjustable straps allow easy fitting to most existing rise/recliner chairs
- Designed and manufactured in the UK.
- Max user weight 150kg (23st)

Devonshire House, Cofton Road, Marsh Barton, Exeter, EX2 8QW
