

OdorBac Tec⁴ Coronavirus (Covid-19) Update V6

OdorBac Coronavirus Virucidal Activity Test Results Standard Method BS EN14476:2013+A2:2019

With the demand for products to combat the Coronavirus pandemic, it is important that cleaning product manufacturers provide evidence that their products are effective against SARS-CoV2 (virus causing COVID19).

2Pure can confirm that OdorBac Tec⁴ has been tested against Feline Coronavirus and is able to make the claim that OdorBac Tec⁴ is effective against coronaviruses with a 99.99% (log 4) reduction in 1 minute.

This testing was completed by UK laboratory, Microbiological Solutions Limited, Test Identification Reference J002373, dated 24/11/2020.

Why are these results significant?

Safety

OdorBac is not hazardous in any format. Reduce risks to your people and damage to materials by choosing a safe alternative.

Environment

OdorBac is 100% biodegradable and is not harmful to the environment. Reduce your impact in these difficult times.

Consolidation

One product to clean **and** protect ALL surfaces, via any method. Less training, less products, less risk.

Double Protection

OdorBac at a 1:1 dilution provides 99.99% protection against coronaviruses in just 60 seconds, but general cleaning at 1:10 also provides the same level of protection with an increased contact time. As there is no need to rinse OdorBac, this provides added protection even during routine cleaning.
