

*Committed to Care*

# Patient Sling Range

# OXFORD RANGE®

The Oxford sling range is meticulously crafted to cater to diverse lifting needs and applications, incorporating various features for optimal functionality. Each sling is outlined below, with FIM scores serving as an assessment tool to gauge an individual's function across seven levels, ranging from independence to total assistance. The safe working load across the range is set at 227kg, ensuring secure lifting practices. However, it's essential to be aware that the safe working load may differ among different sizes.

For detailed specifications, please consult the individual product brochures for comprehensive information. Additionally, a one-year warranty accompanies each sling in the Oxford range, assuring product reliability and your peace of mind.

# GLOVE SLING™ RANGE

Standard Size	Glove Size
Extra Small	1-2
Small	3-4
Medium	5-8
Large	9-10
Extra Large	11-12

The Glove Sling™ range is recognised as a preferred choice among therapists and care providers, acknowledged for its top performance and exceptionally high quality.

A distinctive feature of the Glove Sling™ range is the implementation of a unique anthropometric scientific sizing method. This method eliminates the guesswork associated with sizing, guaranteeing that the slings will ‘fit like a glove.’ This precision in sizing not only enhances user comfort but also provides assurance to sling prescribers and users alike, making the Glove Sling™ range a reliable and user-friendly choice in the realm of caregiving equipment.

The safe working load for the Glove Sling™ range is 230kg (36st.) for sizes 1-9 and 350kg (55st.) for sizes 10-12.
