

PRESSURE CARE AND PROFILING BEDS

Committed to Care

A comprehensive range of pressure care mattresses and cushions from the Low Risk to the Very High Risk, along with our choice of profiling beds and relevant accessories.

VAST EXPERIENCE

Experienced team to advise you on the best solution for your pressure care needs, and to help you find the most cost effective option long term.

RELIABILITY

As a long-standing supplier of equipment into Care Homes we ensure and promise that all of our equipment has been tried and tested in a care home environment. Replacement parts are readily available at competitive prices to ensure the long-term advantages of using our equipment.

MAINTENANCE

Our in house team of qualified engineers are specially trained to carry out maintenance, repairs and servicing to nearly all types of pressure care systems. This is backed up with a large stock of parts to enable us to return systems quickly.

▼ Piezo

Mattress Replacement System

High-Very High Risk

- 8 inch (20cm) 20 cell dynamic replacement
- 9 min 36 second (2 cell cycle)
- Maximum weight: 26 stone (160kgs)
- Suitable for electric profiling beds
- Lightweight and portable for maximum flexibility
- Dual purpose pump with integrated fixing hooks
- Manual comfort setting dial with weight guidance table (lbs, kgs, st)
- Low pressure detection unit with audible and visual alarms with an alarm mute facility
- Static mode function
- Choice of comfort or 2 way stretch cover with 360° zip
- Easily accessible twin tag CPR facility
- Constructed from high quality, durable materials
- One year warranty included
- Standard size 200 x 90 x 20.3cm
- 6 loop retaining straps to secure mattress to base
- 4 static head cells to avoid unnecessary head movement
- 3 non-slip base pads

▲ Auto Adjust

Advanced Mattress Replacement System

Low-Medium-High-Very High Risk

- Automatically adjusts to the patients weight
- Removable heel cell
- Inflatable foot plate
- 8 inch (20cm) 20 cell dynamic cell replacement
- Removable and adjustable heel section and foot plate
- 4 Therapy modes for optimum comfort
- Maximum patient weight 200 kg (32 stone)
- Suitable for Electric profiling beds
- Small and lightweight pump
- Low pressure detection with audible and visual alarms
- Anti-tamper safety lockout feature
- Easily accessible twin tag CPR
- Power down failure alarm
- Minimal operating and ambient noise
- Low maintenance
- Static mode function (for patient care and cleansing)
- Clinically evaluated
- One year warranty
- Additional support to sacral area
- Spare replacement cells
- Lightweight and portable for maximum flexibility
- Digital panel setting
- Constructed from high quality durable materials
- Standard size 200 x 90 x 20cm

Air Mattress Systems

▼ Baros

Advance Mattress Overlay System

Medium - High Risk

- 5 inch (12.5cm) 17 cell dynamic overlay
- 9 min 36 second (2 cell cycle)
- Maximum weight: 22 stone (140kgs)
- Suitable for electric profiling beds
- Lightweight and portable for maximum flexibility
- Dual purpose pump with integrated fixing hooks
- Manual comfort setting dial with weight guidance table (lbs, kgs, st)
- Elasticised retainers to secure the mattress to the base
- Low pressure detection unit with audible and visual alarms with an alarm mute facility
- Static mode function (for patient care and cleansing)
- Easily accessible single tag CPR facility
- Choice of comfort or 2 way stretch cover with 360° zip
- Constructed from high quality, durable materials
- One year warranty included
- Standard size 200 x 90 x 12.5cm
- 3 static head cells to avoid unnecessary head movement

Baros

Baros Compact

▲ Baros Compact

Mattress Overlay System

Low-Medium Risk

- 4 inch (10cm) 18 cell dynamic overlay
- 9 min 36 second (2 cell cycle)
- Maximum weight: 19 stone (121kgs)
- Suitable for electric profiling beds
- Lightweight and portable for maximum flexibility
- Dual purpose pump with integrated fixing hooks
- Manual weight setting dial (kgs)
- Low pressure detection unit with visual alarm
- Vapour Permeable waterproof PU nylon cover with 360° zip
- Constructed from high quality, durable materials
- One year warranty included
- Standard size 200 x 90 x 10cm
- Non slip pads on underside of the mattress base
- Strap to attach to underlay

▼ Super Nova

Mattress Replacement System

High Risk

- Electronic pressure sensor for correct weight / inflation ration
- Adjustable time cycle
- Low pressure alarm
- Inflation indicator
- Mains on indicator
- Cell pressure indicator
- Weight / comfort setting
- CPR valve
- 8 inch cells with 2 inch foam base should mattress deflate
- Built in anti-bacterial / anti-microbial agents that prevent odours
- Zipped, quilted & waterproof yet breathable mattress cover
- Quiet in operation. Switches off once inflated between cycles
- Laser vented cells between shoulder and waist
- Takes up to 180kg
- Fitted with quick release couplings on pump and mattress
- Fitted with true static mode

Static Mattresses

▼ Softform Premier MaxiGlide

Very High Risk

The Softform Premier MaxiGlide mattress offers a new and innovative glide mechanism that significantly reduces shear and friction forces when used with an electric profiling bed. The patented design of the mattress allows the top surface to provide excellent pressure reducing properties along with a high level of comfort and support, whilst the base of the mattress uniquely separates to conform to the bed frame. Suitable for use with those who are considered to be at Very High Risk of developing pressure ulcers.

Features include:

- Two-way stretch, vapour-permeable and waterproof polyurethane cover with high frequency welded seams and a full length flap concealing the zip.
- The toughened PU coated base protects the mattress against metal bed frames.
- The top cover is easily removed for laundering and foam inspection.
- Mattress does not require turning or rotating.

▼ Superflex SX63

Medium-High Risk

The high quality single foam Supaflex mattress offers exceptional comfort if your patient is at medium or high risk of developing pressure sores. It is fitted with a sewn two-way stretch waterproof cover which not only allows the mattress to breathe, but also means the foam can move and adjust to the profile of the patients body.

▼ Reflect

High Risk

The Harvest Reflect mattress is fully profiled on both faces to suit all types of beds and has a deep layer of visco foam of 70mm and an overall mattress depth of 170mm (6¾"). The mattress can be used with either side facing the patient although it is recommended that the visco side be in contact with the body so as to provide close support and a luxury feel effect. Turning is not required thus reducing the workload on the carer but 'spinning' to change the body imprint is advisable.

The outer cover is two-way stretch vapour permeable fabric as used on other Harvest products. The whole product is very comfortable and, by supporting the pressure points, reduces vertical interface pressure and horizontal shear forces. The profiled surfaces increase under body ventilation and enhance the airflow around the mattress.

Interested? - Call 01392 273355 and speak to our friendly office team.

Dynamic Seat cushions

▼ Seat Cushion and Pump

- 4 inch (10cm) 6 cell dynamic cushion
- Supported by a foam base
- 9 min 36 seconds (2 cell cycle)
- Maximum weight: 19 stone (121kgs)
- Suitable for all standard size chairs
- Compatible with any of the Baros & Piezo pumps.
- Supplied with a Baros Compact pump
- Lightweight and portable for maximum flexibility
- Two-way stretch waterproof cover
- Non-slip base
- Easy clean
- Constructed from high quality, durable materials
- One year warranty included
- Takes 10 seconds to inflate
- Standard size 44 x 44 x 10cm
- Ergonomically designed foam front section for leg support
- Long pipe connection

▼ Mobicare

A mobilized air alternating pressure relief cushion designed to provide pressure relief whilst on the go.

- Foam base: Integrated 2" foam base provides additional protection in case of power failure
- Skid proof pad: Avoid cushion from possible sliding
- Quick release coupling: Easy connection between power unit and seating cushion

▼ The Freedom Cushion

- 10, 15, 20 Minute cycle time
- Portable cushion, with battery run pump - patient free to move around without fixed power lead
- Five comfort settings ranging from 1-5
- 4 cell dynamic cushion
- Maximum patient weight: 19 stone (125kgs)
- Suitable for all standard size chairs, and wheelchairs
- Lightweight and portable
- Two-way stretch waterproof cover
- Non-slip base
- Easy clean
- Constructed from high quality, durable materials
- Takes approximately 40 seconds to inflate
- Size: 43 x 43 x 10 cm
- Ergonomically designed foam front section for leg support
- Long pipe connection
- Storage pocket for temporary storage on seat
- Long fixing straps on pump to fix to seat
- AC/DC adaptor to charge unit

Electric Profiling Beds

▼ Defero

The easy fold bed that is low, long and strong

- Unique fold out action
- 10 inch (26cm) minimum height adjustment
- 6 foot 8 inch (205cm) mattress length
- 32 stone (200kg) patient user weight
- Four section profiling platform
- Easy to use handset
- Locking castors
- Metal slatted platform
- Light oak headboard and footboard
- Single person assembly in minutes
- 10 year structural warranty
- Easy storage

Defero Fold Down Cot sides also available

▼ Casa Med Classic FS

Offering an attractive and non-clinical finish, this best-selling bed is beautifully finished with enclosed motors and curved beech effect head and foot board.

- Integral side rails
- Dewert motor, handset and controls
- Dual motor headrest and knee brake adjustment
- Electric backrest, leg rest, knee break and lower leg elevation
- Emergency lowering by quick action bolt mechanism
- Four braked castors
- Four section mattress support
- Quick-release pins on all actuator points
- Tool-free assembling and dismantling
- Height adjustment 40 - 80cm
- Maximum user weight 140kg / 22st
- Available as metal mesh or wooden slat base.

▼ Casa Med Classic FS Low

The Casa Med Classic Low offers the combination of low positioning and integral side rails to ensure a safe resting and sleeping environment for those at risk of falling out of bed, providing the highest levels of safety standards.

- This bed offers all the features of the Casa Med Classic but with a height adjustment of 23 - 63cm.
- Option to purchase bed without integral side rails

Static Seat Cushions and Bed Accessories

▼ Modular Foam

Low Risk

Provides pressure reduction combined with stability and a high level of comfort

- Complete with a two way stretch vapour permeable waterproof cover for low risk usage.

▼ Visco Sandwich

Medium Risk

Two-way turn memory cushion, with visco to both surfaces bonded to a high resilient core.

▼ Reflect

High Risk

A high risk castellated visco cushion on a high density foam base and covered with a two way stretch vapour permeable cover

▼ Prevogel

High Risk

Made of a visco-elastic gel layer curved in the ischal area and features a high resilience foam support. The overall assembly is protected on five of its sides by a neoprene cover with a waterproof non-slip base. This cushion is suitable for those at a high risk of developing pressure ulcers.

▼ Patient Helper

- Offers additional positioning for lying or sitting in bed
- Can be fitted to the left or right side of all Casa Med beds
- Adjustable height strap
- Moulded plastic hand grip
- 125kg / 19st max user weight

▼ Casa Med Bed Extension Kit

1. Bed Extension Bracket
2. Mattress infill
3. Longer side rails

- Enables a profiling bed to be extended by 22cm / 9"
- Fits users from 196 to 216 cm / 6' 5" to 7' 1"
- The extension bracket fits to the foot section while the mattress infill and longer side rails ensure a safe caring environment

▼ Height Extension Side Rails

For use with profiling beds with integral side rails

- Helps ensure the rail is kept within BS height requirements when the total mattress thickness exceeds the recommended height for rail fitting
- Rail simply sits on the top rail and is secured with two hand knobs
- 3/4 length and full length available
- Supplied in pairs

▼ Cotside Bumpers

A foam filled pair of durable bed rail protectors, designed to be fixed in place to protect residents. Simple wipe clean, fluid proof surface with Velcro fastening.

Available in;

- Standard (covers approx 3/4 of the cotsides)
- Long (covers full length of the cotsides)
- Long/High Sided (for use with High sided cotsides)

▲ Mesh Cotside Bumpers

Full length bed rail protection specifically designed for use with rails that drop down, and profiling beds. Foam filled with a simple wipe clean, fluid proof surface and a zipper fastening.

▼ Side Wedge with Draw Sheet

- Ideal for positioning for pressure relief or as an alternative to a bed rail
- Can be used on all types of beds
- Secures to the mattress using hoop and loop fastenings
- Quick-release buckles for use in the event of an emergency
- Each side wedge is removable
