## INTERACTIVE DIGITAL TABLE

- Introducing 'Person Centred Care' through the use of technology
- Creating a positive atmosphere for residents and carers
- Inspiring interaction between patients, carers and loved ones

The 40" Interactive Activity Touch Table is uniquely designed for the Care Home environment. It is a fully integrated, portable and adjustable interactive table which is simply used the same way as a smart phone or Ipad... but with a much larger screen offering excellent visibility for individual patients or groups.

**“This product is revolutionising the way we positively occupy our residents, the possibilities with it are endless!”**

- Brain Training Apps
- Collaborative Apps
- Gaming Apps
- Keep fit lessons, sing-alongs & quizzes
- Viewing the web
- Watching films and catch-up TV (Netflix & Amazon)
- Skype with loved ones from across the world

### REMIND ME CARE

Remind Me Care is an app exercising person centred care, activities and companionship software, which is National Institute for Health and Care Excellence compliant. This software stores personal likes, dislikes, history, specific care details and more, which can be accessed through the app by family members and friends in a GDPR compliant manner.

### TECHNOLOGY BENEFITS FOR CARE HOMES

Technology is becoming an ever-increasing presence in our daily lives, yet the elderly have missed out on this technology revolution.

Technology can vastly improve the health and well-being of the elderly in care homes. Many people worry their relatives will become isolated and immobile in a care home, therefore reliant on staff members or family visits for any contact. Introducing care homes to technology such as Skype (an app created to communicate with voice and video to connect with loved ones across the world) can help care home residents become more interactive and maintain a sense of connection beyond the care home.
